User Manual for the “Spotlight 2”

By using the “Spotlight 2”, you have perfect light and visibility on your work while making ear impressions. Risks are reduced because you can clearly see what you are doing.

The “Spotlight 2” is a very lightweight (35 grams), extremely bright (700 lumens) light source, which can easily be clicked onto an impression syringe using the convenient mounting bracket. The lamp battery can be recharged in the holder using a USB-C charging cable (500 mAh).

The set consists of only two parts:

The NightCore keychain lamp

The special holder

De Nightcore
Using the push button in the center, you can switch the lamp on and off. With the button on the front, you can adjust the brightness.

With a fully charged battery, the “Spotlight 2” provides 45 minutes of maximum light output.

By switching on the NightCore and holding both control buttons for 2 seconds, the lamp switches to continuous mode after activation.
(Do not forget to turn it off after use.)

In the other mode (as delivered), the lamp lights for only 1 minute and then switches off automatically.

For more detailed information about the “NightCore”, please refer to the included manufacturer documentation.

The Holder
The holder is printed from PLA material and is sufficiently flexible for use on both narrow and wider cartridges. Mixed use (sometimes on narrow cartridges and sometimes on wide ones) is not recommended.
If desired, you may purchase a second separate holder.

First Use
Remove the lamp and holder from the packaging.
Remove the clip from the lamp.
Slide the holder onto the place where the clip was.
Click the “Spotlight 2” onto your impression syringe — ready for use.

The lamp battery is factory charged. It is recommended to fully charge it before first use.

Charging the Battery
Use a USB-C cable and connect it to the connector on the side of the lamp.
The holder does not need to be removed during charging.

Opties
Available separately USB-C charging cable (not included)
USB charger (not included)

Warranty
Both the NightCore and the holder come with a two-year warranty.

Supplier / Manufacturer
The “Spotlight 2” is produced on behalf of BB Hearing by our trusted production partner Probetubes.com.
